42000 Series - Patented SST with LED Ring

The Patented 42000 Series Stainless Steel Beverage Holder with LED Ring is a new option for interior boat lighting. This is available in blue or white, but can be special-ordered in other colors. Like all our products, it uses a low amount of amperage and provides users a high quality, low cost option for lighting. This beverage holder attaches to the boat with a double-stick gasket.

- Patented product
- Polished and passivated SST beverage holder with LED ring
- Produces smooth, even lighting
- Uses RDI's three-phase drain system
- Easy to install
- Wire harness is enclosed in protective shroud
- LED ring is sealed and attached to the underside of the SST beverage holder

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
