

Arc Light - Patent Pending

RDI introduces another first: the Arc Light. This Patent Pending fixture provides illumination through a wide arc, shedding light on areas that previously had been difficult to reach.

In addition, the Arc Light is easy to install. Unlike standard long strip lighting with time-consuming multiple attachments, the Arc Light is a single product. It can be installed on flat, curved or angled areas of the boat, even in hard-to-light areas, providing safe illumination where otherwise impossible.

Standard with RGB lighting, the Arc Light provides a variety of colors instantly, making it easy to change the ambiance of the boat.

- Standard with RGB lighting
- Easy to install
- Possible to install one or multiple on many different types of surfaces, even difficult-to-light areas
- Patent Pending
- Illuminates in wide arc

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
