Stainless Steel Telescoping Boat Ladders

The RDI Telescoping Boat Ladder provides boaters with a lightweight, stainless steel ladder. This durable product is available in a variety of step options, and its telescoping design takes up less room in storage.

- 304 and 316 SST construction
- Available in 1-, 2-, 3-, or 4-step designs
- Telescoping design results in smaller storage area
- Wide, black molded plastic steps fused to ladder
- Lightweight yet strong for added durability
- Smooth welds
- Other boat-to-ladder attachments available
- Custom designs are available to fit individual boat builder needs.

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
