Spring Locking Device - 85100

The Spring Locking Device is a Patent Pending alternative to easily secure beverage holders to the boat. To use, simply remove the outer drain cap and fit the locking device to the underside of the beverage holder. Replace the drain cap, then fold the springs down from the resting position so they enter the installation hole. Once the cup is inserted, the springs will return to resting position, holding the cup in place.

- Patent Pending
- Easy to use on all RDI beverage holders
- Secures beverage holder into the boat with no screws or adhesives
- Durable and strong plastic mounting plate
- SST heavy duty springs attached to mounting plate
- RDI can install or they can be added as needed by your personnel
- Inexpensive and easy to use

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
