45000 Series - Patented Lighted Beverage Holder

The Patented 45000 Series - Lighted Beverage Holder builds upon the design of our original, Patented 33000 series of beverage holders. We've improved by evening out the light along the rim, which produces a more uniform glow through the inside and outside of the beverage holder. A SST trim ring mutes light to protect boaters' eyes. This product uses RDI's unique drain system and can connect to a number of attachments. Available standard in blue or white, and through special order in red, green or amber.

- Patented product
- Manufactured from durable acrylic materials
- Recessed harness protects wires
- Available with SST trim ring and internal full-form black silicone, 4-tabbed, UV enhanced insert

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
