Patented Battery Powered Lighted Beverage Holder

Powered by 4 AAA batteries and operated by a single on/off switch, the Battery Powered LED LBH fits in most boats' existing stainless steel or plastic beverage holders.

Features:

- LED is a low-energy requirement system
- Beverage lips can be illuminated in
 - Blue
 - Red
 - Green
 - White
 - Gold
- Soft lighting for evening use
- Polished SST trim ring available for installation over top of lip on beverage holder limits LED light illuminating through the sides of the beverage holder's lip
- Unique design allows use with most current SST and plastic beverages holders in current boats
- Made from opaque polymer material

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
