

## Two Piece Locking Beverage Holder

The Patent Pending, Two Piece Locking Beverage Holder secures beverage holders to the boat. The beverage holder can be installed through two different methods: clips or screws. Plastic beverage holders are held in place by the use of bumps molded into the side wall, while metal beverage holders are secured through the use of two or more locking pins with insulation pads. The plastic version comes a SST rim cover.

- Patent Pending
- Two piece locking device
- Easy to install
- Two alternative designs: locking ring can be secured by screws or clips
- Ring sits flush and secure
- Double-stick gasket helps waterproof installation
- Beverage holder flange ring covers locking ring after installation
- Available to fit most RDI beverage holders

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
