

Recessed Speaker Cover

In the past, boaters had to contend with the bulkiness of speaker covers that protruded into the boat, which was both visually and functionally unappealing. The Recessed Speaker Holder is different from older models. It's designed to allow speakers to be installed flush to the installation wall.

The speaker is mounted to a strong internal support, which was developed to accommodate multiple speaker sizes. Reinforced nylon and 316 SST combine for a strong product.

Features and benefits

- Designed to allow speakers to be installed flush to the installation wall
- Mounted to a strong, internal support to accommodate multiple speaker sizes
- External, polished SST speaker cover provides a high-quality, finished look
- Reinforced nylon and 316 SST combine to provide a strong and durable product
- External cover can be designed to meet your unique design requirements
- Easy to install
- Easy to remove for access to the boat's internal areas

RDI, Inc. supplies high-quality, first-of-their-kind products for consumers who demand a higher standard of innovation. Specializing in marine, arborist and ladder hardware, RDI is an independent agent, designing, producing and prototyping innovative and customized products to meet the needs of individual builders.
